EXAMINER'S COMMENT

1. Claims 17 and 27 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 25, 26 and 32 are, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 9/19/2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Claim 1 is allowed because the prior art of record when considered as a whole, alone or in combination, neither anticipates nor renders obvious a process for monitoring the temperature in a refrigerator comprising a temperature sensitive element in contact with a thermal buffer liquid inside the refrigerator and visually observing the temperature sensitive element as it is in the transparent container to determine if a temperature variable property of the temperature sensitive element indicates that the temperature in the refrigerator is at, below or above a predetermined

Art Unit: 3744

temperature range. Claims 17 and 27 are allowed because the prior art of record when considered as a whole, alone or in combination, neither anticipates nor renders obvious a refrigerator temperature monitoring unit comprising a temperature sensitive element in thermal contact with a thermal buffer liquid inside the refrigerator wherein the temperature sensitive element changes from a first color to a second color when a temperature of the buffer liquid changes from below a first threshold temperature to above the first threshold temperature, wherein the first threshold temperature is above 0°C.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chen-Wen Jiang whose telephone number is (571) 272-4809. The examiner can normally be reached on Monday-Thursday from 8:00 to 6:30.
